

percent of the payment yield for each day involved.

(2) 11 through 24 calendar days, the assigned production will be based on 10 percent of the payment yield plus an additional two percent reduction of the payment yield for each day of days 11 through 24 which are involved.

(3) 25 or more calendar days or a date in which the crop would not reasonably be expected to mature by harvest, the assigned production will be based on 50 percent of the payment yield or such greater amount determined by the county committee to be appropriate.

(h) Assigned production for producers with contracts to receive a guaranteed payment for production of an eligible crop will be established by the county committee by:

(1) Determining the total amount of guaranteed payment for the unit;

(2) Converting the guaranteed payment to guaranteed production by dividing the total amount of guaranteed payment by the approved county price for the crop or variety or such other factor deemed appropriate if otherwise the production would appear to be too high; and

(3) Establishing the production for the unit as the greater of the actual net production for the unit or the guaranteed payment.

### Subpart B—1998 Single-Year Crop Loss Disaster Assistance Program

#### § 1477.201 Single-year crop losses.

(a) To receive disaster benefits under this subpart which covers single-year 1998 crop losses, the county committee must determine that because of a disaster, the producer with respect to the 1998 crop year:

(1) Was prevented from planting a crop;

(2) Sustained a loss in excess of 35 percent of the expected production of a crop;

(3) Sustained a loss in excess of 35 percent of the value for value loss crops; or

(4) Sustained damage in excess of 20 percent of an individual stand of eligible trees, after adjustments for normal mortality.

(b) Calculation of benefits under this subpart shall not include losses:

(1) That are the result of poor management decisions or poor farming practices as determined by the county committee on a case-by-case basis based on instructions issued by the Deputy Administrator;

(2) That are the result of the failure of the producer to reseed or replant to the same crop in the county where it is customary to reseed or replant after a loss;

(3) That are not as a result of a natural disaster;

(4) To crops not intended for harvest in crop year 1998;

(5) To losses of by-products resulting from processing or harvesting a crop, such as cotton seed, peanut shells, wheat or oat straw;

(6) To home gardens; or

(7) As a result of water contained or released by any governmental, public, or private dam or reservoir project if an easement exists on the acreage affected for the containment or release of the water.

(c) Calculation of benefits under this subpart for ornamental nursery stock shall not include losses:

(1) Caused by a failure of power supply or brownouts;

(2) Caused by the inability to market nursery stock as a result of quarantine, boycott, or refusal of a buyer to accept production;

(3) Caused by fire;

(4) Affecting crops where weeds and other forms of undergrowth in the vicinity of the nursery stock have not been controlled; or

(5) Caused by the collapse or failure of buildings or structures.

(d) Calculation of benefits under this subpart for honey where the honey production by colonies or bees was diminished, shall not include losses:

(1) Where the inability to extract was due to the unavailability of equipment; the collapse or failure of equipment or apparatus used in the honey operation;

(2) Resulting from improper storage of honey;

(3) To honey production because of bee feeding;

(4) Caused by the application of chemicals;

## § 1477.202

(5) Caused by theft, fire, or vandalism;

(6) Caused by the movement of bees by the producer or any other person; or

(7) Due to disease or pest infestation of the colonies.

### § 1477.202 Calculating rates and yields.

(a) Payment rates for 1998 single-year crop losses shall be:

(1) 65 percent of the maximum established RMA price for insured crops;

(2) 65 percent of the State average price for noninsurable crops;

(3) 60 percent of the maximum established RMA price for uninsured crops; and

(4) 65 percent of the established practice rate for damage to eligible trees.

(b) Disaster benefits under this subpart for losses to crops other than trees shall be made in an amount determined by multiplying the loss of production in excess of 35 percent of the expected production by the applicable payment rate established according to paragraph (a) of this section.

(c) Disaster benefits under this subpart for losses of trees shall be made in an amount determined by multiplying the quantity of acres or number of trees in a practice approved by the county committee according to instructions issued by the Deputy Administrator, by the payment rate established according to paragraph (a) of this section.

(d) Separate payment rates and yields for the same crop may be established according to instructions issued by the Deputy Administrator, when there is supporting data from NASS or other sources approved by CCC that show there is a significant difference in yield or value based on a distinct and separate end use of the crop. In spite of differences in yield or values, separate rates or yields shall not be established for crops with different cultural practices, such as organically or hydroponically grown.

(e) Each eligible producer's share of a disaster payment shall be based on the producer's share of the crop or crop proceeds, or, if no crop was produced, the share the producer would have received if the crop had been produced. In cases where crop insurance provides for a landlord/tenant to insure the tenant/

## 7 CFR Ch. XIV (1-1-01 Edition)

landlord's share according to part 457 of this title, disaster payments will be issued on the same basis.

(f) When calculating a payment for a unit loss:

(1) The unharvested payment factor shall be applied to crop acreage planted but not harvested; and

(2) The prevented planting factor shall be applied to any prevented planted acreage eligible for payment.

(g) Production from all end uses of a multi-use crop or all secondary uses for multiple market crops will be calculated separately and summarized together.

### § 1477.203 Production losses, producer responsibility.

(a) Where available, RMA loss records will be used for insured crops.

(b) If RMA loss records are not available, producers are responsible for:

(1) Retaining or providing, when required, the best verifiable or reliable production records available for the crop;

(2) Summarizing all the production evidence;

(3) Accounting for the total amount of unit production for the crop, whether or not records reflect this production; and

(4) Providing the information in a manner that can be easily understood by the county committee.

(c) In determining production under this section the producer must supply acceptable production records to substantiate production to the county committee. If the eligible crop was sold or otherwise disposed of through commercial channels, acceptable production records include: commercial receipts; settlement sheets; warehouse ledger sheets; or load summaries; appraisal information from a loss adjuster acceptable to CCC. If the eligible crop was farm-stored, sold, fed to livestock, or disposed of in means other than commercial channels, acceptable production records include: truck scale tickets; appraisal information from a loss adjuster acceptable to CCC; contemporaneous diaries; or other documentary evidence, such as contemporaneous measurements.

(d) Producers must provide all records for any production of a crop
